

Bhavesh K Damor

Hello, I am Bhavesh. A passionate and enthusiastic full stack developer (MERN & PERN stack). I love new challenges and new projects that help me invest all my skills and experience into succeeding them. I give my best to any work regarding this field.

EDUCATION:

Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT),

Bachelor of Technology, Information and Communication Technology, India

May 2020

Atomic Energy Central School, CBSE

May 2016

EXPERIENCE:

Technical Cloud Intern at Junept Software LLP.

Jan 2020 - June 2020

- Deduced Cloud Solutions for Junept Software using Microsoft Azure. .
- Deployed a client-server model using virtual machines & also added security rules on them.
- Worked with APIs using API management service, controlled and redirected internet traffic to appropriate endpoints.
- Learned about some essential services of Microsoft Azure like automation accounts, update management, antivirus update, bastion, CLI commands. By learning different services on Microsoft Azure, I got a better vision on Infrastructure as a service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS)

MERN stack developer at Arctic Devs.

Feb 2022 - current

SKILLS:

- **Tools:** Github , Postman , Heroku , Microsoft Azure , MongoDB Compass , PgAdmin4.
- **Technical Skills:** C , C++ , HTML , CSS , Bootstrap, Javascript , React.js , Material-UI, Styled Components, Redux.js , Node.js , Express.js , MongoDB , MongoDB atlas , PostgreSQL
- **Expertise Areas of Interest:** Data Structures and Algorithms, Operating System, Database Management systems, Object oriented programming.

PROJECTS:

•

Project Name	StarMart Ecommerce App
Technologies Used	React, Redux, Node, Express, MongoDB Atlas, Jsonwebtoken, Cloudinary, Stripe.js
Description	An ecommerce app built on MERN stack. A new user can create their account by signing up and can later sign in or log out , can place orders, leave reviews on the products, can edit & delete their profile, change password & can also review their placed orders. Other notable features included are , filters on product page, forgot password functionality, payment using stripe. Admin can perform CRUD operations on products, can change order status, edit & delete both the users and the reviews they left. All these admin operations are held in dashboard. Admin credentials to access dashboard are : Email - admin@gmail.com Password - admin123
Live Demo	https://starmart-ecommerce.herokuapp.com/

-

Project Name	Simple Netflix Clone
Technologies Used	React, Redux, Redux-thunk, Node, Express, MongoDB Atlas, Jsonwebtoken, Cloudinary
Description	A Netflix clone built on MERN stack where a user can sign up and then can filter or view movies & series. They can also view trailers in the carousel component and when they click on it then they are redirected for viewing. A signed in user can perform CRUD operations on their profile
Live Demo	https://netflix-5.herokuapp.com/

-

Project Name	Landing Page
Technologies Used	React, Bootstrap
Description	A landing page for a travel website with sections like about us , services provided , team members & contact info. Also I have used react smooth scrolling package for seamless navigation experience
Live Demo	https://landing-page-trvl.netlify.app/

-

Project Name	Video Calling App
Technologies Used	React, NodeJs, Socket.io, webRTC
Description	You can enter you username under 'Name' field and that name will be displayed to you and to your calling mate. To make a call , copy your id by clicking on the respective button and then pass it to your friend. Now tell your friend to paste that id to 'ID to Call' field and then to click on the call button. A notification will pop-up whether to answer or hang up the call.
